Description

A beautiful copper reproduction vintage pendant factory light with a highly polished finish. The light comes complete with a B22 nickel plated lampholder fully wired to a 3 core light grey braided 1 metre cable, (no electrical sub assembly required). The pendant also comes with a nickel plated ceiling rose, fixings and a 3 way electrical terminal block for final connection. Applications can include, the home, kitchen islands, bars, cafes, restaurants, industrial/retro offices and loft apartments.

Note: The light has been polished by hand and could have slight blemishes and imperfections in the finish, being polished the finish will dull down and age over time, this in our opinion only adds to the character of the light.

We can supply different colours and lengths of cable upon request. An additional charge will be applicable. Please email with your requirements. (See Cable Colours)

Important / Installation: Please ensure the light is installed by a competent and qualified electrician
