Description

A superb quality reproduction round bulkhead shiplight, manufactured from cast aluminium with a highly polished finish. The light comes complete with a clear glass dome, a B22 nickel plated lampholder, pre wired with a black, one meter, 3 core mains lead. The light has a gasket seal giving an IP54 rating (see specification) ensuring the light is suitable for outdoor use. Fixing screws and raw plugs are included. Applications can include, the home, garden, bars, restaurants, hotels, receptions and on a nautical theme, house boats, barges and narrow boats.

Note: The light has been polished by hand and could have slight blemishes and imperfections in the finish, being polished the finish will dull down and age over time, this in our opinion only adds to the character of the light. A clear coat lacquer can be applied to prevent the dulling process. This will incur an additional cost. Do not over tighten the brass cover screws.

Important / Installation: Please ensure the light is installed by a competent and qualified electrician.

Specification

Size : 23cm in diameter and 11cm deep

Weight: 1.8 kilos

Supply : 230V

Earth : This item must be earthed
